Since then, there have been a number of changes and therefore it was necessary to rewrite the policy. This policy will continue to keep MWCD in compliance with Government Accounting Standards Board (GASB) Statement No. 34. GASB 34 requires that governments depreciate their exhaustible assets, including infrastructure.

6.07 CADIZ WATER SUPPLY AGREEMENT

Members of the Board were informed of a letter dated April 9, 2012, from Ken Zitko, Mayor of the Village of Cadiz, formally requesting an increase in the current allocation of water from Tappan Lake (a copy of which is on file).

Mr. Milleson, Economic Development Coordinator for the Cadiz CIC, addressed the Board stating that the Village of Cadiz has pledged to invest all profits from the sale of water into wastewater treatment plant improvements.

Mr. Horstman urged that the Village of Cadiz keep the whole of Harrison County in mind and not just the interests of the Village.
6.08 TEMPORARY WATER PURCHASE AGREEMENT

Attorney Pringle reviewed the policies regarding water sales (ORC 6101.53) and water supply agreements (ORC 6101.24).

In 2010, 6101.53 addresses water sales under the sole jurisdiction of the Board of Directors. Water supply agreements (ORC 6101.24) must be approved by the Conservancy Court.

Water sales (ORC 6101.53) are short-term agreements that stipulate a limit on the quantity of water to be withdrawn and where the water is to be withdrawn, protects the reservoir shoreline at the withdrawal site, and sets a rate schedule.

The proposed temporary water purchase agreement being considered was termed in recent new media publications as an “emergency” measure. Mr. Logan stressed that MWCD representatives have never referred to this proposal as an “emergency.” Additionally, Mr. Logan shared that a direct supply of water from the reservoir would eliminate 1,800 to 2,400 semi-tanker round trips supplying water to the well site during hydraulic fracturing.

Mr. Slogar informed the Board that USGS and the U.S. Army Corps of Engineers are working on an analysis of the impact on MWCD reservoirs from potential future water withdrawal requests. He stated that, according to his calculation, 11 million gallons water at Clendening Reservoir corresponds to 0.22 (22 one-hundredths) of an inch of reservoir pool. This amount is similar to depth of a stack of 40 sheets of paper.

Mr. Logan distributed a spreadsheet entitled “Comparison of Rates – Sale of Water” which provided information regarding rates of water sale agreements with the State of Ohio, City of Steubenville, and the Tuscarawas County Port Authority.

Mr. Hoopingarner reported that to date MWCD representatives have met with individual members of the Conservancy Court in pre-trial sessions, open to the public. Thirteen of the 18 counties have been visited and in each instance, Mr. Hoopingarner has informed the judge that there will be discussion about potential water sale requests relative to the oil and gas industry.

There has been a question raised by the public as to “why not wait” to withdraw water for this request. Mr. Hoopingarner stated that there has been a desire on behalf of camp officials and Gulfport Energy to have the well drilled at Clendening on the Boy Scout Camp area prior to the upcoming summer camping season.

Ms. Harper requested that the minutes reflect her opinion that her questions and concerns were mostly unanswered. Mr. Logan had previously stated that “all 9” of her stated items were addressed.

On motion by Mr. Parham, seconded by Mr. Pryce, an amendment to the water sales policy adopted July 23, 2010, to include a mineral development category and authorization to enter into an agreement with Gulfport Energy to supply up to 8 million gallons of water from Clendening Reservoir, as recommended and set forth in the above memorandum, were approved.
