6.06 2014 ANNUAL MAINTENANCE ASSESSMENT

Discussion took place relative to a reduction in the maintenance assessment. At their April 18, 2014 meeting, the Board of Directors approved a plan to provide for a 50 percent reduction in all assessment payments from property owners beginning in 2015 by using funds generated from the MWCD’s recent oil and gas leases of its property in the Utica Shale development to cover project costs normally paid for by the assessment funds. The Board will continue to review periodic financial reports to determine if further reductions will be warranted.

The Board then took the following actions:

In order to maintain the works of the Muskingum Watershed Conservancy District, it is necessary to levy a maintenance assessment as set forth in Ohio Revised Code, Section 6101.55. Following is the Certificate of Annual Levy for the MWCD.

It is recommended that the Board approve a maintenance assessment in the aggregate sum of $5,676,019.41.

7. REPORTS

7.01 MARINA REPORTS

Members of the Board received a copy of the Summary of Marina Operations report for the period ending August 31, 2014.

The 2014 boating season is beginning to wind down at all MWCD marinas. Overall revenues at our leased marinas are up 9% from last year. Two good measures of boating activity - boat, motor and gas sales, and boat rentals continue their steady growth, rising 22% and 14% respectively, from last year. Keith Ott's Leesville South Fork Marina (formerly Clow's), shows double digit increases in all categories. Revenues at both Clendening and Leesville Petersburg marinas are showing the impact of many pipeline workers now leaving the area, with camping revenues in particular returning to pre-boom levels. Over-all revenues at Tappan Marina are up 39% with boat, motor and gas sales up 157%, and service and storage up 210%. Docking revenues at that facility are down, however.

Turning to MWCD-operated marinas, overall revenues are up 25% at Seneca, and 8% at Piedmont. Seneca has seen large increases in docking (26%), fuel sales (44%), and the continuing success of the Dockside Restaurant, along with a greatly expanded camp/marine store, have contributed to miscellaneous sales revenues rising 50%.

A ribbon-cutting ceremony for the Piedmont re-development project, held August 29, was attended by approximately 100 people, including representatives from ODNR Division of Watercraft, local elected officials, area tourism agencies, and most important, our customers.

Permitting work has begun for the new restroom/shower building at Clendening. Site work and construction will begin after this camping season.

Construction of the service/repair building at Seneca Lake Marina is underway. The floor is poured, the structure is framed and under roof, and installation of siding is set to begin shortly. Completion is expected by early October.

Planning is underway for several Master Plan-recommended dock replacements and additions, at both Piedmont and Seneca marinas. With occupancy rates high at both facilities, additional slips will be added.

7.02 LAKE DRAWDOWN SCHEDULE FOR 2014-2015

In accordance with the U.S. Army Corps of Engineers Control Manuals, the following table shows proposed lake drawdowns for the winter of 2014-2015. This schedule will be presented to the U.S. Army Corps of Engineers and the Ohio Department of Natural Resources for their review and approval.
To accommodate autumn boating, fishing and hunting, and to help reduce shoreline erosion, it is recommended that the drawdowns occur on an even release basis and at the rate stipulated above (release duration) so as to reach the intended lowered elevation.

We request of the Army Corps of Engineers that refill begin February 15 on those reservoirs that can reasonably meet the intermediate refill date due to the nature of the reservoir, precipitation in that area, etc. For those reservoirs that cannot reasonably meet the March 15 refill date, please continue to begin refill on February 1. This delay will allow MWCD an additional two weeks to address any projects that need to be completed during drawdown, i.e. shoreline stabilization projects, dredging, dock repairs, etc.

This is provided for informational purposes only and requires no action on the part of the Board.

7.03 TAPPIAN MARINA COMPLAINT

A copy of a letter received on September 11, 2014, from an unidentified group of “Tappan Lake Boaters” expressing concerns related to Tappan Marina was distributed to Board members. This was provided for information only.

Mr. Olivier responded to the complaint letter by reporting that he has been working with Tappan Marina operators throughout the season to address some issues there. Many improvements in conditions at the marina have been accomplished with work on electric service at the docks, painting, landscaping, and other maintenance items.

2) Master Plan Implementation
3) Dredge Program
4) Fiscal Management
