As part of the strategic plan, key goals and objectives will be identified along with the implementation of financial operating principles. A measurement system will be developed and implemented to report progress on the plan to the Board, staff, key stakeholders and the public.

2) **To evaluate and recommend a course of action in light of current oil and gas development opportunities.** This goal will involve the consideration of the environmental impacts as it relates to our mission. If it is agreed that oil and gas resources will be further developed, then a plan for the wise stewardship of these resources will be developed.

3) **To reduce and eventually eliminate the negative financial liability of the Atwood Lake Resort and Conference Center to the MWCD so that it is no longer a material factor in the overall operations of MWCD.** This goal will identify the options for the Resort property, reduce expenditures and develop a plan for the future of the Resort property in light of the MWCD mission to provide recreational opportunities to the residents of the watershed and beyond.

4) **To address recreation operations in light of current economic conditions and customer demands.** This goal will address plans for reinvestment in the recreation infrastructure, capital improvements and other recreational opportunities. This goal will focus on the development of a plan for capital improvements to recreation facilities. In addition, this goal will address the challenges faced by our marina operators and develop solutions resulting in improved service to our public.

5) **To identify and develop conservation programs under the Amendment to the Official Plan.** This goal will address work to be performed in the related categories of sediment removal, shoreline protection, water quality improvements, watershed management, reservoir maintenance and partnering with local, state and federal agencies. This goal will include the recruitment of leadership to guide this program. As a result of this goal, quantification of our progress in the above categories will be tracked and reported.

6) **To submit for consideration of the Conservancy Court the Subsequent Appraisal Record as required by law.** This goal will involve the review of the process by the Board of Appraisers, due process compliance, and include certification of the Annual Levy Detail. This goal ensures the continued fair and equitable application of the maintenance assessment.
